Definitions across overlays

```
normalize <- function(x) {
  (x - mean(x)) / sd(x)
}
```

Definitions across overlays

```r
normalize <- function(x) {
  (x - mean(x)) / sd(x)
}
```

`normalize(rnorm(10))` links to its definition, on every overlay.

An animated session

```
> x <- rnorm(100, mean = 5)
```

An animated session

```
> x <- rnorm(100, mean = 5)
> round(mean(x))
[1] 5
```

An animated session

```
> x <- rnorm(100, mean = 5)
> round(mean(x))
[1] 5
> range(round(x)) |> diff()
[1] 4
```

flowR finds the packages

```
pkgs <- c("tidyr", "purrr")
for (p in pkgs) library(p, character.only = TRUE)
pivot_longer(df, cols = -id) |> map(nrow)
```
